Not illustrated. 1906 Excerpt: .the fact that water softened with plain reagents such as lime and soda is at the same time sterilized without being injured in any way in taste or quality. The hard water of Canterbury and Southampton in England has been softened for years with lime, and no one has ever complained. The City of Columbus, Ohio, is going to soften all its water supply. There are in Europe thousands of water-softening plants, not only for industrial water but also for drinkingwater, and these are doing most excellent work. The water to which alum is added on its way to house filters is rendered hard and unsuitable for drinking. The devices in which the alum is placed and from which the solution flows into the stream of raw water going to the filter are frequently defective. Sometimes the valves that proportionate the alum solution to the applied water are opened more than they ought to be, and an excess of the chemical is applied and goes right through the filter, passing out undecomposed. Such water is extremely unpleasant for bathing and washing, for it does not lather, and taken with food it curdles it and renders digestion difficult. Dr. Leffmann has pointed out one of the most serious objections to the use of alum in the chemical treatment of water, namely, the transformation of the temporary hardness (due to bicarbonate of lime, which precipitates as mud in the boilers) into permanent hardness (due to sulphate of lime,...
