Time-series plot of annual 7-day low flows for the Chagrin River at Willoughby, Ohio, with LOWESS curve. in concert with annual precipitation, most likely explaining worsen if the flood-carrying capacity of the stream channel is reduced through an increase in effective channel rough-why upward trends in annual mean streamflows and annual ness or a reduction in main-channel area. The effective 7-day low flows were observed. The absence of any statisti-roughness of a stream is influenced by a number of factors, cally significant trend in peak streamflows indicates that the such as obstructions and vegetation in the channel, the intensity and severity of flood-producing storms did not amount of channel meandering, and the amount of longitudi-increase appreciably along with the increases in annual pre-nal variation in channel size and shape. No attempt was made cipitation. to assess trends in channel roughness directly, owing to a lack of available data on all of the underlying factors; how-ever, data were sufficient to assess...
