Hunting Down the Universe: The Missing Mass, Primordial Black Holes, and Other Dark Matters

By Michael Hawkins

Basic Books. Paperback. Book Condition: New. Paperback. 256 pages. Dimensions: 9.0in. x 6.0in. x 0.7in. This work describes Dr Hawkins discovery that the vast bulk of the universe is in the form of primordial black holes which had their genesis within the first instant of creation. It is a key cosmological breakthrough that draws together the most significant insights of our era into a comprehensive view of the universe. Dr Hawkins started an investigation 20 years ago into 300 quasars - the brightest objects in the universe - and why they change in brightness. Calculations based on his research showed that 99 percent of the universe is made up of dark objects that cannot be directly seen - some as big as the planet Jupiter, others mini black holes (imploded stars). Their discovery has solved the mystery of what constitutes as much as 99 percent of the universes mass. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
